Singularity Computers Spectre 2.0 Elite Kit Front - Black

$549.00

Product Images

Short Description

Take your Spectre to the next level with additional manifolds. The Elite Kit Front is a replacement for the entire front panel of Spectre. It mounts infront of the front 360mm radiator and does not remove the radiator position. It still allows for plenty of ventilation with a large surface area for airflow around the entire perimeter of the manifold. The inlet and outlet for the manifold is at the top and is accessible above the front 360mm radiator.

Description

The Spectre 2.0 Elite Kit Front Manifold mounts onto the front panel of Spectre without removing the front 360mm radiator mounting position. There is still plenty of ventilation for the front fans and radiator via a CNC machined spacer which runs around the entire perimeter of the manifold. Connections can be made above the front 360mm radiator (extra fittings are required). This manifold only serves an aesthetic purpose to add more character to your build. Lighting can be added to make the manifold glow and this is a perfect opportunity to use RGB fans.

Specifications

Compatibility:
Compatible with all 360mm radiators.
See Spectre 2.0 Fittings Information, click Here

Specifications:
Manifold & Airflow Spacer: CNC Machined Cast Acrylic.
Front Aluminium 360mm Radiator Mount Panel.
