Singularity Computers Spectre Elite Kit – Side Manifold - Black

$249.00

Product Images

Short Description

Take your Spectre to the next level with additional manifolds. The Spectre Elite Kit Side integrates even more of your cooling loop into the case structure. It mounts using the Rear IO Plate and comes with a specific one included. The port layout of the side elite kit is specifically for standard EK GPU water-blocks from the GTX 1080 onwards, it will not align with any other GPU water-blocks. It works with GPUs in standard or vertical orientation. The CPU ports will not align directly over the CPU water-block or monoblock but there is plenty of space between the back of the Elite Kit Side and the motherboard to route fittings and tube.

Description

The new version of the Spectre 2.0 Side Elite Kit has an updated design and aesthetics and it now includes a cover panel for the LED mounting position. It now mounts directly to the case without the need for a new expansion slot bracket.

The Spectre 2.0 Side Elite Kit Manifold is designed to integrate more of your loop into the case structure and clean up tube runs. It mounts to the rear IO plate using the existing fasteners on the case. It can be used with GPUs in Vertical GPU configuration or standard orientation. The manifold mounts far enough away from the motherboard to make connections to any CPU or motherboard water-block. It has 8 ports and the middle ports are on both sides to give more options for multi GPU configurations. It has an included LED strip position which is 130mm long and 7mm wide.

Specifications

Compatibility:

Designed for perfect alignment with EK reference PCB RTX series water-blocks. Will possibly work with other GPU water-blocks but more fittings may be required due to port alignment being different. If using a water-block aside from EK reference PCB RTX in Vertical GPU configuration, maximum water-block width is up to 140mm. The Side Elite Kit is compatible with any motherboard or CPU water-block. The LED strip position fits 7mm wide LED strips which will need to be cut to 130mm in length.

Specifications:

Manifold: CNC Machined Cast Acrylic.

Stop Fittings: Powder coated Brass with diamond knurling, 6mm hex and laser etched Singularity Computers logo.

Ports: G1/4" BSPP x8.

Included Items:

Spectre 2.0 Side Elite Kit.

Stop Fittings: x2.

Additional Information

Brand	Singularity Computers
SKU	SC-SPECTRE-ELITE-SIDE-BK-D
Weight	3.0000
Color	Black
Reservoir Type	Distribution plate
Vendor SKU/EAN	9351182001998
Special Price	$149.40
