Short Description

4" cathodes are the ideal solution for small cases or just those small areas of a case where you would like to have a light. These cathodes are small enough to fit almost anywhere. The inverter supports two 4" or 12" lamps for a really bright glow !

Description

4" cathodes are the ideal solution for small cases or just those small areas of a case where you would like to have a light. These cathodes are small enough to fit almost anywhere. The inverter supports two 4" or 12" lamps for a really bright glow !

These Kits now are now 50% brighter: Brightness: 29,000 cd/m2!!!

No need to wire your own Cathodes. This kit provides the ease of use and the brightness that any modder has in mind. Just plug the Cathode in, Mount the tube using the zip ties and the square mount, flip the switch, and you're Set!

Cathode bulb power cables are fully covered in Premium sleeving and heatshrink, colors of your choice. Add an extra 4 or 12 inch bulb using the options below.
