

Mainframe Customs Male 4pin Power Terminal – (5 Count)

\$0.25

Product Images

Short Description

You are looking at the Molex 4 Pin Power Female Terminal (5 count). This terminal is used on many 4 Pin power cables on a power supply and are of Molex Brand or Molex Brand quality.

We have searched high and low to bring you the best quality terminals that will hold firmly and work in any crimper out there. More so, these terminals will crimp perfectly in our Ratchet Crimping Tool.

Description

You are looking at the Molex 4 Pin Power Female Terminal (5 count). This terminal is used on many 4 Pin power cables on a power supply and are of Molex Brand or Molex Brand quality.

We have searched high and low to bring you the best quality terminals that will hold firmly and work in any crimper out there. More so, these terminals will crimp perfectly in our Ratchet Crimping Tool.

We are selling these in 5 counts as I believe this to be the best number to multiply by so you can have the right number of terminals.

Remember when buying terminals you should always buy at least 20 extra for mistakes and learning to crimp in the first place so you don't have to make another order.
