

Mainframe Customs 1/4" 3:1 Heatshrink – Black

\$0.99

Product Images

Short Description

Our premium 1/4" 3:1 heat shrink tailored just for the heatshrinkless style. Combining just the right wall thickness with heat tolerance makes this heat shrink easily to sleeve with. Many brands of heat shrink either are too thick or don't stand up to heat well. This causes either a gummy mess or heat shrink that does not evenly melt the sleeve underneath.

Description

Our premium 1/4" 3:1 heat shrink tailored just for the heatshrinkless style. Combining just the right wall thickness with heat tolerance makes this heat shrink easy to sleeve with. Many brands of heat shrink either are too thick or don't stand up to heat well. This causes either a gummy mess or heat shrink that does not evenly melt the sleeve underneath.

This heatshrink is also great for making double wires! Use the heatshrink at a longer length (18-22mm) to shrink the sleeve over your solder joints.

A 4ft length can provide you with about 100 – 115 pieces!

This heatshrink is meant to be disposable. Generally a 10 – 15mm piece is all you need to use at a time. This heatshrink is commonly used with PET types of sleeve such as our Teleios sleeve.

This product is sold and priced by the foot

Additional Information

Brand	MAINFrame Customs
SKU	MC-14-31-BLACK
Weight	0.0500
