Short Description

Our Stealth cable combs are truly the last cable combs you will ever need. We have spent hours fine tuning in a comb that not only hugs the wires closely, but also provides the support and durability that your cables need.

Description

Our Stealth cable combs are truly the last cable combs you will ever need. We have spent hours fine tuning in a comb that not only hugs the wires closely, but also provides the support and durability that your cables need.

The combs start its journey from a sheet of only the highest quality 1/8" acrylic which provides the combs with its durability. The thickness of the acrylic also plays an important role so that the combs are not too thick compromising its stealthy look. The acrylic sheets are then cut by an extremely precise laser cutter which cuts out the combs from the sheet. The laser beam polishes the inner, and outside edges of the comb to provide an extremely smooth surface. Not every comb made however is perfect. Our very strict quality control eliminates combs that are not up to our high quality standards. We throw any and all combs away that fail our quality control test.

Unlike other combs which are 3D printed producing a fragile comb with rough edges, our stealth cable combs are built to last the life of your cables. With 10's of thousands sold its no wonder!

Our combs work great with our: Teleios sleeve, pre-sleeved wires, Custom Extension Cables, Coreless Paracord, as well as other 4mm PET sleeve types.

These combs are made to be installed before connecting your wires into your connectors. If you have cables already made however, you can purchase our Molex Extractor to easily extract the wires from the connector.

Made in the U.S.A!

One comb per single quantity.

Additional Information

Brand	MAINFrame Customs
SKU	MC-STEALTHCOMB-BLACK
Weight	0.0200
Color	Black
Wire Management Type	Comb
Material	Acrylic
