Eurotool Cut Lube

\$6.99

Product Images

Short Description

Eurotool cut lube reduces friction, chatter, and damaging heat build up when using dremel bits. Speeds up production of modding. Extends the life of burs, cutters, drills, gravers, sawblades, etc. Clean and easy to use. Convenient push-up tube. This item is replacing Bursaver, a very similar product and less expensive.

Description

Eurotool cut lube reduces friction, chatter, and damaging heat build up when using dremel bits. Speeds up production of modding. Extends the life of burs, cutters, drills, gravers, sawblades, etc. Clean and easy to use. Convenient push-up tube. This item is replacing Bursaver, a very similar product and less expensive.

Features

Directions:

DRILLS: Apply compount to tip of drill before starting each hole.

SAWBLADES: Apply on sawblade or the piece being sawed.

BURS: Dip Bur into compound every 30 seconds to get fast, clean, and smooth cuts.

GRAVERS: Melt compound on flat surface and run graver through it after every 4 or 5 cuts.

DRAWPLATES: Apply compound to the hole and to the wire before drawing it.
