Description

Bitpower CPU Block Summit M with OLED

Bitpower offers an efficient and stylish solution for CPU water cooling with our new CPU Block Summit M (OLED). Including brackets and accessories for both Intel and AMD platforms, this CPU block is all you'll need to keep your processor cool. The block features a stylish top plate design and digital RGB lighting, as well as a digital thermal sensor and a bright OLED display so you can monitor your water cooling loop temperature.

In order to make heat exchange as efficient as possible, the copper base plate features a layer of 0.3mm fins/channels to increase the surface area, which is essential for heat dissipation. Then, the Bitpower water injection design brings a high flow of coolant directly on top of these fins for immediate cooling.

The CPU block Summit M with OLED, equipped with Bitpower Digital RGB around the top plate, is sure to become the center of attention of your case with bright LEDs that are certified by ASUS AURA Sync, GIGABYTE RGB Fusion, MSI Mystic Light Sync, and ASRock Polychrome.
