

EK-Pro GPU Quick Disconnect Kit

\$109.99

Product Images

Short Description

The EK-Pro GPU Quick Disconnect Kit is the most efficient way to transform your liquid-cooled GPU into a quick-disconnect ready water block assembly.

For the best results, EK recommends the use of EK Pro-Manifolds (sold separately) in combination with the Quick Disconnect Kit since it enables a quick and easy assembly and disassembly of the liquid cooling loop without the need of draining the entire setup. This avoids precious down-time for workstations and other professionally used computer setups.

Description

The EK-Pro GPU Quick Disconnect Kit is the most efficient way to transform your liquid-cooled GPU into a quick-disconnect ready water block assembly.

For the best results, EK recommends the use of EK Pro-Manifolds (sold separately) in combination with the Quick Disconnect Kit since it enables a quick and easy assembly and disassembly of the liquid cooling loop without the need of draining the entire setup. This avoids precious down-time for workstations and other professionally used computer setups.

The kit consists of everything that you would need to transform your existing GPU water block into a quick-disconnect ready product. Included are: 1 meter of Black ZMT 6,5/9,5mm tubing, two 6mm OD barb fittings, four tube clamps, 45° Angled GPU Terminal and two sets of Quick Disconnect fittings.
