Short Description

The HEATKILLER® SW-X is a modular cooling system for mainboard voltage regulators. If combined with the modular HEATKILLER® NSB 3.0, it allows complete water-cooling of mainboards.

Stock heat-sinks often work at their performance limits and lack sufficient reserves. Removal of the CPU-Fan in water-cooled systems further increases thermal problems. Therefore, temperature sensitive components should be integrated into the cooling loop, especially on high-end mainboards. The increased cooling performance will guarantee stable operation even at maximum loads.

Description

The HEATKILLER® SW-X is a modular cooling system for mainboard voltage regulators. If combined with the modular HEATKILLER® NSB 3.0, it allows complete water-cooling of mainboards.

Stock heat-sinks often work at their performance limits and lack sufficient reserves. Removal of the CPU-Fan in water-cooled systems further increases thermal problems. Therefore, temperature sensitive components should be integrated into the cooling loop, especially on high-end mainboards. The increased cooling performance will guarantee stable operation even at maximum loads.

All cooler parts are CNC-machined and completely made from copper (LT versions have tops made of black POM). The large cross section of internal structures keeps flow resistance low.

The HEATKILLER® SW-X is modular and can be converted for use on different mainboards by simply swapping the baseplate. Separately sold kits allow the re-use of cooler tops on new hardware.

For easy selection of coolers, please look up your mainboard or one of similar design in the following compatibility list.

[Compatibility list](#)

For some mainboards complete sets with coolers for northbridge, southbridge, and voltage regulators are on offer.

Specifications

Specifications:

Dimensions (L x W x H): 80.0 x 14.5 (16.5) x 17.5 mm (top)

Material: Electrolytic copper (top coated with a special clear varnish to prevent staining)

Weight: approx. 160 g

Pressure tested: 5 bar

Sealing: NBR 70 (max. 120°C)

Threads: 2x G ¼" (DIN ISO 228-1)

Included:

1x HEATKILLER® SW-X A21

1x Installation material/manual

Additional Information

Brand	Watercool
SKU	WC-11610-D
Weight	1.0000
Color	Copper
Chipset Motherboard	ASUS TUF B450M
Block Style	Copper
Material	Copper
Special Price	\$34.80
