Short Description

The Venturi High Flow Series fans are optimized for low-restriction airflow environments, making them an excellent choice for computer case fans, or other low-restriction usage scenarios

Description

Designed for strength and silence

These fans can move an amazing amount of air compared to other fans at the same, minimal noise level. The Venturi High Flow Series fans are ideal for anyone looking for a perfect balance between high performance and low noise built from sturdy, high-quality materials.

Features

- Made from high-grade glass fiber reinforced thermoplastic polymer
- Ground-breaking airflow, perfect for low-restriction usage scenarios
- Aerodynamical stator struts reduce noise and unwanted turbulence
- Strategically placed notches on the blades further reduce and diffuse any humming noise produced when the blades pass the stator struts
- The trip wire technology introduces a micro-turbulent layer that combats elements that negatively affect performance, resulting in quieter operation
- Powerful motor maintains a reliable speed and an adapter for reducing the speed without the use of a fan controller
