

Aquacomputer RGBpx adapter for components with mainboard connection

\$3.95

Product Images

Short Description

Adapter for connecting third party components with motherboard header to a RGBpx output.

Description

Adapter for connecting third party components with motherboard header to a RGBpx output.

This adapter is compatible to various components (for example fans) of third party suppliers featuring addressable RGB LEDs, given the component is equipped with a matching connector and LEDs compatible to the RGBpx system.
