## Product Images

## Short Description

Lian-Li unveils their first all aluminum enclosure, the EX-125. The EX-125 is the first external drive enclosure for Lian-Li to bring to the market as all previous drive enclosures have been internal models.

## Description

### Product Details:

Lian-Li unveils their first all aluminum enclosure, the EX-125. The EX-125 is the first external drive enclosure for Lian-Li to bring to the market as all previous drive enclosures have been internal models.

The EX-125 is quite versatile as it can house any ATA133 hard drive in addition to any ATA133 5.25" CD/DVD drive. Not surprisingly Lian-Li has maxed out the possible connectivity options, allowing for USB2.0, IEEE1394A, and blistering fast

IEEE1394B. The enclosure is made completely out of aluminum - staying in line with the vast majority of Lian-Li products. The enclosure simply looks stunning and feels even better!
