Short Description

EK-Quantum Magnitude Cold plate - Flat Copper is a special cold plate, engineered without any curvature to be used with lapped IHS or aftermarket flat IHS.

Description

EK-Quantum Magnitude Cold plate - Flat Copper is a special cold plate, engineered without any curvature to be used with lapped IHS or aftermarket flat IHS.

The regular Magnitude cold plates are made with specific curvature depending on the socket type in order in order to make the best contact and most pressure on the die and avoid raised parts of the IHS, Due to that curvature, they are not ideal for uses when the stock IHS is lapped or replaced with an aftermarket solution that is flatter. This is easily remedied by replacing the stock cold plate with the EK-Quantum Magnitude Coldplate – Flat Copper, which has perfect fitment unto flat surfaces.

Important: only use 0.5P jet plate for Intel 20XX and AMD AM4 versions of the block, and 0.5C for Intel 115X version.

This cold plate is made of high-grade copper.

Specifications

Enclosed:

- EK-Quantum Magnitude Coldplate - Flat
- 0.5P and 0.5C jet plates

Made in Europe - Slovenia!

PLEASE NOTE:

- Not to be used without an IHS

Additional Info

Full
Copper

Additional Information

Brand	EK Waterblocks
SKU	EK-MAG-COLDPLATE-CU
Weight	0.3000
Color	Copper
Block Accessory Type	CPU Baseplate
Block CPU Type	Intel/AMD
Vendor SKU/EAN	3831109822524
