Short Description

Milled from solid aluminum, this backplate can be mounted in addition to a kryographics NEXT 2080 water cooler and thus in particular significantly improve the force distribution in the area of the voltage regulator.

Description

Milled from solid aluminum, this backplate can be mounted in addition to a kryographics NEXT 2080 water cooler and thus in particular significantly improve the force distribution in the area of the voltage regulator. The backplate is black anodized. For optimum heat dissipation, the backplate is connected directly to the water circuit via a heat pipe. For this purpose, the connection terminal of the graphics card cooler is removed and then the graphics card cooler connected directly to the heatpipe connection terminal of the backplate.

Specifications

Material:	Aluminium
Manufacturer:	Aquacomputer
Hardware manufacturer:	NVIDIA
Hardware model:	RTX 2080

Materials:

- Backplate: aluminum, black anodized
- Heatpipe: copper, nickel plated
- Heat pipe mounting plate: stainless steel
- Connection terminal: acetal

Delivery:

- A backplate
- A heat pipe
- A connection terminal
- mounting material

Note: Delivery without graphics card and without kryographics water cooler!

Additional Information

Brand	Aquacomputer
SKU	AQ-23683-D
Weight	0.6000
Color	Black
Vga	NVIDIA® GeForce® RTX 2080
Block GPU Type	Nvidia
Block Accessory Type	VGA Backplate
Material	Aluminum
Vendor SKU/EAN	4260473312321
Special Price	\$19.95
