SKU1072 SLIGER SM560 Filter Kit

Short Description

THE GREATEST FAN AIR FILTERS EVER DESIGNED!!! Now available in a Sliger SM560 Filter Kit!

DEMCiflex Computer Air Filter is the easiest of all Computer Air Filters to use. No need for any skills. No Glue, No Screws, No Tools and No Hassles. All you have to do is to locate your computer's air intake vents. Use a sheet of paper to see if any particular fan draws air into the case or blows it out. All inlet fans and un-fanned openings can be protected by DEMCiflex.

Description

This filter kit is designed to fit the Sliger SM560 computer case. It may be ordered in any of the available color combinations.

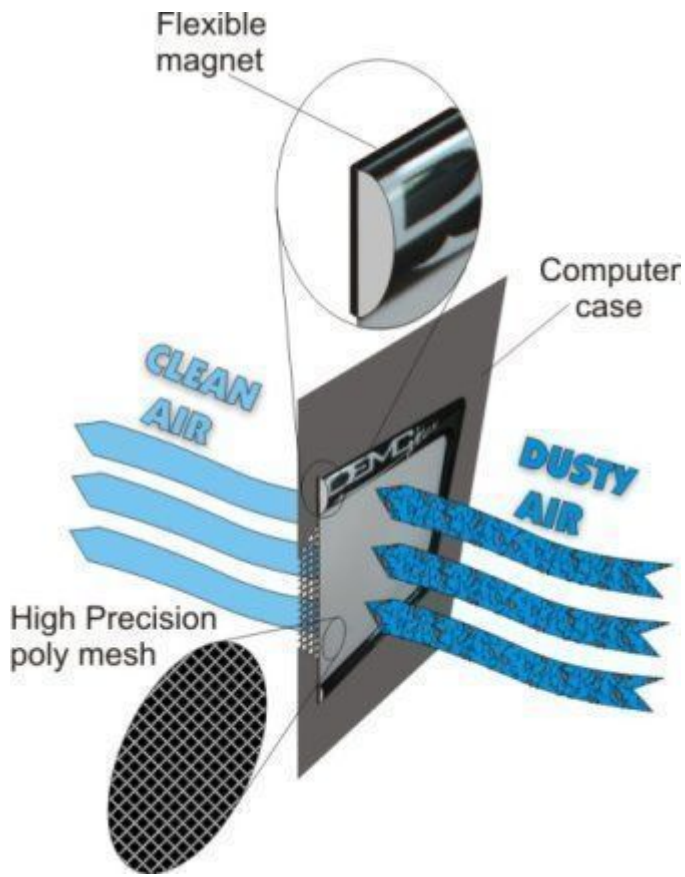

It consists of 5 filters to cover all the vents of this case. It can be ordered as a full kit, which allows you to chop and change the airflow arrangement of the case as you wish, or the filters may be ordered individually depending on your airflow arrangement.

DEMCiflex Computer Air Filter is the easiest of all Computer Air Filters to use. No need for any skills. No Glue, No Screws, No Tools and No Hassles. All you have to do is to locate your computer's air intake vents. Use a sheet of paper to see if any particular fan draws air into the case or blows it out. All inlet fans and un-fanned openings can be protected by DEMCiflex.

These filter are magnetic and will attach themselves to your ferrous / metallic chassis. If you have a plastic or aluminum case then we include a magnetic strip with adhesive for easy install anywhere.

Because the mesh is black it is easy to see when the filter needs cleaning. After cleaning out the unit initially maintenance consists of taking the DEMCifilter off by hand, dusting it off by hand or soft brush and replacing it over the air intake. That simple. No dismantling, no tools, no glue or screws needed. DEMCifilter has no moving parts and has a one-piece lightweight design. DEMCifilter is fitted over the fan intake or vent holes by way of magnetic strip built into the filter. Even if the case is non-metallic, a lightweight and flexible magnetic frame (optional extra) can be fitted to the case and DEMCifilter can be fitted onto it. This will extend the lifespan of the computer and lead to less downtime and an overall more enjoyable computer experience.

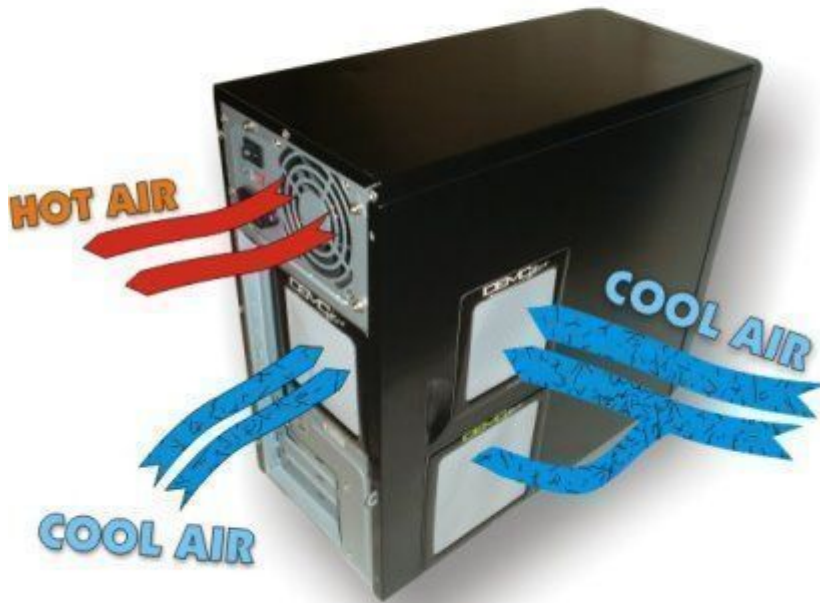

<pDownloads:

We know that users concentrate on other tasks when using their PCs so we have developed software to remind them on when DEMCiflex Computer Dust Filter needs cleaning.
