Short Description

Bitpower Touchaqua VGA Vertical Support has a multi-point support structure which can make upright graphics card installations more stable. The pure aluminum material, with its streamlined design and classic black style, is not only a display card upright stand, but also a textured piece of art.

Description

Bitpower Touchaqua Dual VGA Vertical Support

Bitpower Touchaqua VGA Vertical Support has a multi-point support structure which can make upright graphics card installations more stable. The pure aluminum material, with its streamlined design and classic black style, is not only a display card upright stand, but also a textured piece of art.

With a 22-cm PCIe x16 riser flexible cable, it acts as a bridge between the graphics card and the motherboard, and can achieve stable transmissions at 8Gbps. The cable used by Bitpower is made of high-quality wire and has been strenuously tested to minimize problems with signal attenuation.
