Short Description

EK-Quantum Torque Rotary (Adapter Fitting) is a revolvable T adapter fitting with G1/4" threads. In the form of a cut-off cylinder, it is very sturdy and there are zero movements in the revolvable joint. With one male and two female threads, it can be used for setting up drain ports, 90-degree angles or parallel connection between components. This Quantum Line adapter is made out of CNC machined brass with high-quality satin titanium finish while the seal is made by quality rubber O-rings. Satin Titanium Quantum Torque series fittings are intentionally not painted on the inside to reduce the level of possible pollutants in the loop. It is

an extremely secure and sturdy piece that will last for many future builds.
