

EK-Loop D-RGB LED Strip - 180mm

\$8.49

Product Images

Short Description

Replacement individually addressable D-RGB strip for upgrading existing EK products. The strip is 180mm long and can replace standard RGB strips in CPU blocks, monoblocks, reservoirs, and pump-combos. The

strip is connected via a 3-pin connector to supported 5V headers that are present on most modern motherboards.

Description

Replacement individually addressable D-RGB strip for upgrading existing EK products. The strip is 180mm long and can replace standard RGB strips in CPU blocks, monoblocks, reservoirs, and pump-combos. The strip is connected via a 3-pin connector to supported 5V headers that are present on most modern motherboards.

Specifications

Technical data:

- Connection type: 3-pin (+5V, D, Blocked, Ground)
- Rated voltage: 5V DC
- Number of LEDs: 11 (60LED/m density)
- Strip length: 180mm
- Strip width: 4mm
- Cable length: 500mm

PLEASE NOTE:

- Should not be used with 12V headers as that will damage the diodes, they should be powered exclusively by 5V header.
