Short Description

High-performance cooling liquid for your computer water cooling system from Liquid.cool.

This ready-to-use mixture is made of high-quality components such as osmosis water, non-toxic ethylene glycol and water-soluble paints in the EU.

Description

High-performance cooling liquid for your computer water cooling system from Liquid.cool.

This ready-to-use mixture is made of high-quality components such as osmosis water, non-toxic ethylene glycol and water-soluble paints in the EU.

The CFX is, due to the latest heat transfer technologies, an extremely good heat transfer medium and keeps your components such as radiator, CPU cooler or pump always cool.

Thanks to the 100% soluble paint particles it gives your system the best modding effect.

CFX has a shelf life of 3 years and contains synergistic anticorrosive agents to protect your gaming computer.

Features

- 100% Ready Mix
- Synergistic corrosion inhibitor for the protection of copper, nickel, brass, steel and aluminium
- Tested to BS5117, BS6580 and ASTM D1384 standards

- Electrical conductivity below 10µS/cm (20°C)

Specifications

Specification: Ready to use

Content: 1000ml

Color: blue

Manufacturer: Liquid.cool

Classification - Regulation (EC) No 1272/2008 (CLP)

- Physical and chemical hazards: Not classified as a physical or chemical hazard
- Human health: Not classified as dangerous to health.
- Environment: Not classified as hazardous to the environment.

The product contains less than 0.1% Benzisothiazolinonea and has a child safety cap and induction sealed contents.

Note:

Do not use for longer than 12 months with Hardtubes! Before changing the coolant, rinse the system with distilled water!

Additional Information

Brand	Liquid.Cool
SKU	LC-CFX1000-PB
Weight	2.5000
Color	Blue
Fluid Type	Pre-Mixed Fluids
Volume	1 liter
Vendor SKU/EAN	7004618550882
