

# Thermaltake Level 20 HT Tempered Glass Full Tower Computer Chassis - Snow Edition

\$229.99

## Product Images

## Short Description

---

Distinctive from most cases on the market, the Level 20 HT Snow Edition full tower chassis is specially constructed to continue the legend of the Level 20 series case family. It features four durable 4mm thick tempered glass windows, two preinstalled 140mm standard fans on the top, and is designed with outstanding system ventilation.

## Description

---

Distinctive from most cases on the market, the Level 20 HT Snow Edition full tower chassis is specially constructed to continue the legend of the Level 20 series case family. It features four durable 4mm thick tempered glass windows, two preinstalled 140mm standard fans on the top, and is designed with outstanding system ventilation. The chassis is a premium choice that inhabits a vertical mount design and expansion capabilities for massive custom liquid-cooled systems. The Level 20 HT Snow Edition takes our latest case innovations and wraps them in an ultra-modern style that's utterly unique in the case market today. Stand out from the crowd with the Level 20 HT Snow Edition.

## Features

---

### TT Premium

To continue achieving the corporate mission of delivering the perfect user experience, Thermaltake developed "TT Premium" with the essence of combining supreme quality products with a new logo design. TT Premium is far more than just a guarantee of quality. Behind the name, it represents the passion in DIY,

Modding and Thermaltake's desire to be the most innovative brand in the PC hardware market. To satisfy the demand of the high-end PC users, TT Premium follows its core values of Excellent Quality, Unique Design, Diverse Combinations and Boundless Creativity to provide a high performance PC product for every enthusiast.

#### Tt LCS Certified

Tt LCS Certified is a Thermaltake exclusive certification applied to only products that pass the design and hardcore enthusiasts standards that a true LCS chassis should be held to. The Tt LCS certification was created so that we at Thermaltake can designate to all power users which chassis have been tested to be best compatible with extreme liquid cooling configurations to ensure you get the best performance from the best features and fitment.

#### Distinctive Design DNA

Embedded with the appearance of Level 20 chassis, the pillars of Level 20 HT carry the same structural aesthetics and architectural design but with a vertical tower body. Components in the Level 20 HT are chambers, allowing maximum ventilation and space management optimization.

#### Tempered Glass Window With Ultimate Viewing Angles

The Level 20 HT comes with four tempered glass panels at the front, top and both sides which make it easy to display the internal components. For the front and top tempered glass panels, users can easily unlock by pressing down the locking mechanism located on the top part of the glass, allowing quick and easy access. The left and right hinged doors are also equipped with a smart lock security system allowing you to easily secure the inner components of your case.

#### Dust Reduction

Well-designed quick removal magnetic fan filters on the back and at the base provide excellent dust protection and dirt reduction, ensuring a dust-free environment.

#### Superior Hardware Expansion

The Level 20 HT/HT Snow Edition contains outstanding expandability options, allowing you to build the most high-end system you can dream of. It can support motherboards up to a standard E-ATX, a CPU cooler with a maximum height of 260mm, multi-GPU configurations can be vertically mounted up to 400mm in length (without a HDD rack), a power supply with a length of up to 200mm, and four 2.5"/3.5" (with HDD cage) and one 2.5" (with HDD bracket) storage devices.

#### Exceptional Cooling Possibilities

The Level 20 HT is optimized with outstanding cooling capabilities, delivering fantastic cooling efficiency. Besides two pre-installed standard 140mm exhaust fans on top, this case can accommodate up to three 120mm fans at the bottom and side and two 120mm/140mm fans on top, at the side, or the rear depending on your preference. The Level 20 HT can fit up to 360mm DIY liquid cooling radiators at the bottom and the side.

#### Airflow In and Out

Thanks to the dedicated design of the Level 20 HT, the airflow within the case moves smoothly, ensuring the interior temperature stays low at all time.

## Modern I/O Ports

The top-right I/O port panel features two USB 3.0 and two USB 2.0 data transfer ports, along with one USB 3.1 Type-C port.

## DMD: Dismantlable Modular Design

Strip your case down to the bones and install elements when and as you need them with our modular design. The Level 20 HT features modular panels, racks, brackets, and pre-design mounting arrays. No more unreachable screw corners or gaps, installation can be a breeze with our Dismantlable Modular Design.

## Specifications

---

	CA-1P6-00F6WN-00
	Level 20
	Level 20 HT Snow
	Full Tower
	613 x 468 x 503 mm (24.13 x 18.43 x 19.8 inch)
	20.38 kg / 44.93 lb
	4 x Tempered Glass (4mm thickness)
	Exterior & Interior : White
	SPCC
	Top (exhaust) : 2 x 140 x 140 x 25 mm Turbo fan (1000rpm, 16dBA)
	4 x 3.5" or 2.5" (With HDD Cage) 1 x 2.5" (With HDD Bracket)
	8
	6.7" x 6.7" (Mini ITX), 9.6" x 9.6" (Micro ATX), 12" x 9.6" (ATX) , 12" x 13" (E-ATX)
	1 x Type-C, 2 x USB 2.0, 2 x USB 3.0, 1 x HD Audio
	Standard PS2 PSU (optional)

Left / Right Side:  
3 x 120mm , 2 x 140mm  
Top:  
2 x 120mm , 2 x 140mm  
Rear:  
2 x 120mm , 2 x 140mm  
Bottom:  
3 x 120mm

Left / Right Side:  
1 x 360mm , 1 x 280mm  
Bottom:  
1 x 360mm

CPU cooler height limitation: 260mm  
VGA length limitation: 400mm  
PSU length limitation: 200mm

## Additional Information

Brand	Thermaltake
SKU	CA-1P6-00F6WN-00
Weight	60.0000
Color	White
Chassis Form Factor	Full Tower
Side Panel	Window
Motherboard Support	ATX, E-ATX, Micro ATX
Material	Steel
PSU Wattage	No PSU
