Features

- Aluminum Construction Reservoir (in contact with coolant)

Specifications

Specifications

- Material:ABS Resin / PMMA / Aluminum (in contact with coolant)
- RPM:5000
- Power:DC12v, TDP18W
- Voltage Range:10v-15v
- Flow Rate:1100L/h
- Temperature:45°C @ 4000RPM
- Connector:4-Pin Molex and PWM+ data feedback
- Overall Dimensions:244.92mm x 80mm (84mm from back mount plate to front)
- Reservoir Size:140mm x 56mm

Compatibility

- Fitting:G1/4 Thread
- Coolant:Aluminum Compatible

Included Parts

- 1x Aluminum Top Cap (installed)
- 1x Aluminum Base (installed)
- 1x D5 Variant Pump (installed)
- 1x Reservoir Tube (installed)

Warnings

This Reservoir has aluminum in contact with coolant! Must be used in aluminum friendly systems!
