- 1 X Instructions

Instructions for Usage.

- First fit the 12mm, 13mm or 16mm Plates for the correct size of glass you are scouring.
- Measure the distance from the back-plate to the cutting wheels to the size required and adjust the screws accordingly. Alternatively, mark the glass tube with a Marker pen where you would like to snap and adjust the Jig accordingly making sure the cutting wheel is where you have just marked the glass tube.
- Gently push the correct 12,13 or 16mm centring back cap on the back of the glass tube.
- Place the glass tube on the jig, Back Cap to the rear in the slot on the back-plate.
- Add 1 drop of cutting oil onto the Glass tube where you are about to score.
- Press and push the glass slowly down and away from you 360 Degrease to score the glass.
- Snap the glass tube in one brisk movement facing away from you.
- Job Done.
