

Bykski Metal Pre-Bent Rigid Tubing - Black Coated Copper - 14mm OD - 500mm/200mm

\$27.99

Product Images

Short Description

The Bykski Metal Rigid Tubing is a chrome plated copper material making it extremely durable. It has a seamless construction, which provides a smooth interior surface. It comes in an angled run that allows you to custom fit bends but cutter either end. The added metal in your system can't hurt bringing temperatures

down in transition between components. By absorbing heat from the coolant the tube can dissipate this heat easily with any kind of average internal airflow in your chassis.

Description

The Bykski Metal Rigid Tubing is a chrome plated copper material making it extremely durable. It has a seamless construction, which provides a smooth interior surface. It comes in an angled run that allows you to custom fit bends but cutter either end. The added metal in your system can't hurt bringing temperatures down in transition between components. By absorbing heat from the coolant the tube can dissipate this heat easily with any kind of average internal airflow in your chassis.

Features

- Polished surface
- Extra heat dissipation bonus

Specifications

Specifications

- Temper Rating:Hard
- Material:Copper (black coated)
- Tube Size:12mm Inner Diameter / 14mm Outer Diameter
- Wall Thickness: 2mm

Compatibility

- Fittings:any 14mm OD Rigid Fittings

Parts Included

- Sold Per Stick (an order quantity of 3 would result in a 3x pieces)

Warnings

This is an ADVANCED DIY product!

PrimoChill is not responsible for any damage caused by or when using this product. Please use at your own risk.

Installation

Cutting should be done with the proper tools. Failure to do so can result in nonuniform ends leading to leaking and failure to seal.

Additional Information

Brand	Bykski
SKU	B-PP7TP500X200-14-BK
Weight	1.2500
Color	Black Chrome
Tube Type	Copper
Tube Size	14mm
Material	Copper
Delivery	Bare
