

EK-CryoFuel Mystic Fog (Premix 1000mL)

\$21.99

Product Images

Short Description

EK-CryoFuel Mystic Fog is a unique semi-transparent coolant based on a new formula with long-lasting stability and vivid addressable D-RGB reactivity. The coolant is specially developed to bring the best light dispersion capabilities withing various PC liquid cooling products.

Description

EK-CryoFuel Mystic Fog is a unique semi-transparent coolant based on a new formula with long-lasting stability and vivid addressable D-RGB reactivity. The coolant is specially developed to bring the best light dispersion capabilities withing various PC liquid cooling products.

The coolant contains everything a high-end liquid cooling system requires for efficient thermal performance and providing the necessary protection for your water blocks.

With countless hours of in-house and third-party real-life scenario testing, EK-CryoFuel Mystic Fog is one of the most chemically stable coolants that provides enthusiasts with the best possible level of performance and thermal efficiency. The key feature of the new coolant formula is the perfect ratio of suspended particles versus the clear coolant basis which gives the coolant the unique ability to disperse light. This will provide the best possible foundation for vivid addressable D-RGB effects inside your liquid cooling system.

The coolant will not sediment after long hours of inactivity of the cooling loop. Designed specifically for computer liquid cooling systems, the EK-CryoFuel offers a 2-year shelf life from the date of bottling. For the best light dispersion effects of EK-CryoFuel Mystic Fog, it's recommended to replace the coolant every 6 months.

Features

The EK-CryoFuel Mystic Fog is a complete premix that has the following key characteristics:

- contains corrosion inhibitors
- good heat transfer characteristics
- color pigments don't leave residue
- high specific heat
- chemically stable
- low viscosity
- non-toxic

All EK-CryoFuel mixtures are biodegradable (90% in a period of 10 days) and will not remain in the environment or bioaccumulate.

EK-CryoFuel contains synergistic corrosion inhibitors to protect metals commonly found in computer liquid cooling systems. It has been tested in accordance with BS5117 (ASTM D1384) and found to meet corrosion standards for copper, brass, and stainless steel.

Characteristics:

- low electrical conductivity
 - corrosion protection according to BS5117 (ASTM D1384) standards
 - high quality concentrated pigments for intense, vivid and saturated colors
 - compatible with Acrylic, PETG, POM Acetal, rubber (NBR, EPDM, and Norprene) materials
 - eco-friendly (90% biodegradable in 10 days)
-
- 2-year shelf life after bottling
 - UV Reactive: Yes

Specifications

Technical data:

- color: White (Semi-transparent)
- content: 1000 mL

Made in Slovenia - Europe!

PLEASE NOTE:

- Make sure to use high-purity distilled water to dilute the concentrate!
- For the best light dispersion effects of EK-CryoFuel Mystic Fog, it's recommended to replace the coolant every 6 months.

- Rinse the loop to flush out impurities prior to filling it with the EK-CryoFuel!
- Do not mix or top off with any other liquid, except the same color EK-CryoFuel!
- Do not mix with other EK-CryoFuel series coolants!
- Do not add any biocides to EK-CryoFuel.
- For added color stability, EK strongly recommends that you don't flush your loop with harsh chemicals, vinegar, etc. before the use of EK-CryoFuel.
- We recommend replacing the liquids every 12 months for best performance!
- Not compatible with the Mayhems Blitz cleaning solution!
- Not suitable for aluminum-based liquid cooling loops!
- Avoid splashing of the coolant at all costs! Pouring the coolant into the top inlet of a reservoir can cause excessive foaming.

Additional Information

Brand	EK Waterblocks
SKU	EK-CRYOFUEL-1000-MF
Weight	3.5000
Color	White
Fluid Type	DI Water Based
Volume	1 liter
Vendor SKU/EAN	3831109829912
