Darkside Single LP120 Extra Slim Radiator

\$34.95

Product Images

Short Description

DarkSide LP240 is extreme Low Profile performance computer water-cooling radiator based on latest radiator core design. Built for 120mm fans, this radiator is optimized for maximum heat dissipation for both low noise and performance fans.

Description

DarkSide LP240 is extreme Low Profile performance computer water-cooling radiator based on latest radiator core design. Built for 120mm fans, this radiator is optimized for maximum heat dissipation for both low noise and performance fans.

Radiator features ultra-compact design in two crucial dimensions: radiator thickness and radiator width. Lowered radiator thickness is essential for compact builds with limited clearance, while reduced radiator's width minimizes interference with computer components such as memory.

Radiator side panels are tapped with UNC 6-32 threads on both sides to enable push-pull fan installation if desired. Two ports are ready for any G1/4 threaded fitting to be used.

Specifications

- Specification:
 - Dimensions: 155 x 121 x 27.5mm (L x W x H) Liquid Capacity: ~80mL
 - FPI: 17
 - Port threads: 2x G1/4
 - Copper core, brass tanks/side panels.
 - Fan compatibility: any 120x120x25mm fan
- Enclosed:
 - Radiator
 - Mounting 6-32 screws

Additional Information

Brand	DarkSide
SKU	DS-0489
Weight	1.5000
Color	Black
Radiator Size	120 (1 x 120mm)
Radiator Thickness	27mm
