Mainframe Customs Teleios 4mm Cable Sleeving – NV Green

$0.35 As low as
$0.24

Product Images

Short Description

NV Green: We set out to develop a sleeve color that comes as close as possible to match that of the official NVIDIA Green. To do so, we took the same Pantone number from the official logo and used that to create this beautiful shade. We are proud to announce that this Teleios color is as close as you will ever get.

Description

Teleios – Definition: Greek "complete, finished, perfection – nothing else needed."

Months of development went into crafting the ideal sleeve for beginners just getting into the hobby, to professionals who demand the utmost quality to reflect their project. Teleios sleeve embodies the core components needed to achieve this feat.

Tight PET Filament Weave

To start, PET filaments are tightly wound together to create its circular shape. So tight that it is very difficult to see through the material without it even being stretched. This creates a natural barrier from being able to see the wire underneath the sleeve which is the main goal when sleeving your cables. Furthermore, the sleeve holds its tight weave even when the sleeve is bent, or for example placed around sharp corners. Other sleeve types will fray apart unveiling the wire underneath especially those of larger diameters. We developed Teleios sleeve with this in mind and found 4mm is the perfect blend of size and pliability.

Easy to Use

What makes a sleeve great if it is not easy to use? A great sleeve needs to be easy to use. This implies that beginners will not have issues using the sleeve, or that the technique can be picked up easily. Both of which Teleios sleeve delivers on. Some sleeve types are catered towards the more experienced leaving the beginners feeling frustrated and eventually give up. Sleeving with Teleios is as easy as pulling the sleeve over the wire, and melt.

Industry Standard

Teleios sleeve has been used alongside some of the industry leading technology companies in the world to showcase their new products. From NVIDIA to award winning producers such as Deadmau5 to name a few, Teleios sleeve was used in sleeving the power supplies that powered their new tech. We have been fortunate to be brought alongside in creating these beautifully crafted cables for their projects many of which can be found all over the internet.

Other names include:

- NVIDIA GeForce Garage
- Intel
- EK Water Blocks
- Jayztwocents
- Pualshardware
- Bitwit
- and more..

Note: Sleeving is sold by the foot!

Features

- Tight PET filament weave
- Easy to use (for beginners just starting, or for the professionals)
- Industry standard. Showcased in some of the most elite clientele in the world.
- 4mm diameter hugs the wire effortlessly
- To stretch or not to stretch? You decide.
- Pliable yet holds its shape
- Modern, and sleek color range
- Low melting temperature makes it a must for heatshrinkless sleeving. Enjoy

Additional Information

Brand	MAINFrame Customs
SKU	MC-TELEIOS4MM-NVGREEN
Weight	0.0200
Color	Green
Sleeve Size	4mm
Material	PET
