Short Description

Based on the high quality CP01 Serial ATA II cable, the CP02 adds a 90° angled connector for extra compatibility. Hard drives in small cases or in space-limited application can benefit from this convenient upgrade.

Description

Product Details:

Based on the high quality CP01 Serial ATA II cable, the CP02 adds a 90° angled connector for extra compatibility. Hard drives in small cases or in space-limited application can benefit from this convenient upgrade. Constructed with twice the thickness of regular SATA cables and covered at both ends with shielded plates, high signal integrity is insured for all data transfers up to 3Gb per second. Wrapped in all white protective cover, the CP01 will provide users of high-end storage solutions the best experience not only in performance and security but also in style.

Features

Features:

- Serial ATA II support
- 90° angled connector
- Backwards compatible with SATA I devices
- Superior EMI suppression
- 3Gb/sec transfer rate (SATA II only)
- Higher signal quality for all connected devices
