

Mini Switch Bus with Full Lighted Rockers - Green

\$19.95

Product Images

Short Description

Mini switch bus with 3 switch controls using fully illuminated red rocker switches. Mounted in aluminum Lian Li bay cover. Switches have 2 posts for internal LED power and 1 post for common ground. This rocker will only light up when the switch is on. This bus is already pre-wired by Performance PC's for the ground for all switches saving you time!

Description

Mini switch bus with 3 switch controls using fully illuminated red rocker switches. Mounted in aluminum Lian Li bay cover. Switches have 2 posts for internal LED power and 1 post for common ground. This rocker will only light up when the switch is on. This bus is already pre-wired by Performance PC's for the ground for all switches saving you time!

Easy control of your devices from the front of your PC.

Great looking!

Specifications

- OEM Lian Li Black or Silver Aluminum faceplate
- Designed to fit in a 3.5 inch drive bay
- 3 high quality snap in red rocker switches
- Includes 6 spade connectors for crimping to the wires of any device you wish to control via switches.

Meant to fit any Lian Li case. Fitting in any other case may require modification of the mounting bracket for screw holes.
