Short Description

Concentrate to mix a cooling liquid for your computer water cooling system from the house Liquid.cool itself. This concentrate is made of high-quality components such as non-toxic ethylene glycol and water-soluble paints in the EU and must be mixed with distilled water or osmosis water.

Description

Concentrate to mix a cooling liquid for your computer water cooling system from the house Liquid.cool itself. This concentrate is made of high-quality components such as non-toxic ethylene glycol and water-soluble paints in the EU and must be mixed with distilled water or osmosis water.

The CFX is, due to the latest heat transfer technologies, an extremely good heat transfer medium and keeps your components such as radiator, CPU cooler or pump always cool.

Thanks to the 100% soluble paint particles it gives your system the best modding effect.

CFX has a shelf life of 3 years and contains synergistic anticorrosive agents to protect your gaming computer.

Features

- 100% Ready Mix
- Synergistic corrosion inhibitor for the protection of copper, nickel, brass, steel and aluminium
- Tested to BS5117, BS6580 and ASTM D1384 standards

- Electrical conductivity below 10µS/cm (20°C)

Specifications

Specification: Concentrate

Color: Blue

Manufacturer: Liquid.cool

Content: 150ml

Classification - Regulation (EC) No 1272/2008 (CLP)

- Physical and chemical hazards: Not classified as a physical or chemical hazard
- Human health: Not classified as dangerous to health.
- Environment: Not classified as hazardous to the environment.

The product contains less than 0.1% Benzisothiazolinone and has a child safety cap and induction sealed contents.

Note:

Do not use for longer than 12 months with Hardtubes! Before changing the coolant, rinse the system with distilled water!

Additional Information

Brand	Liquid.Cool
SKU	LC-CFX150-PV
Weight	0.3500
Color	Purple
Fluid Type	Concentrate
Volume	150 ml
Vendor SKU/EAN	7004618552558
