Description

This Bykski CPU Water Cooling Block features an all copper base plate that is covered by a precision machined PMMA top with an aluminum cover. This block fits a wide variety of current AMD processors including ThreadRipper, making it a great choice for AMD users.

The block base is electroplated to prevent oxidation. The top is highly polished PMMA with a black accent cover that isn't in contact with coolant. A high flow design is achieved using 0.5mm channels. This creates good heat dissipation and allows for maximum performance.

Features

- Finest Craftmanship
- Electroplated Base
- Designed to Fit Standard G1/4 Thread Fittings

Specifications

Specifications

- Model:CPU-RAY-MK-M
- Brand:Bykski
- Material:Electroplated High Purity Copper Base / PMMA Top / Aluminum Accent Cover
- Thread:G1/4
- Channel:0.5mm

Compatibility

- Loop:Non-Aluminum
- Socket:AMD AM4 (Ryzen 9, 7, 5, 3)/AM3+/AM3/AM2+/AM2/FM2+/FM2/FM1, TR4/sTRX4
- Fittings:G 1/4 Thread

Parts Included

- 1x CPU Water Cooling Block
- 1x Mounting Hardware
- 5v Addressable RGB LED (RBW)

Warnings:

Manufacturer reserves right to alter block design to expand compatibility. Delivered item may not 100% match pictured item.
