

ae Custom Video Card Brace - Full Aluminum A-RGB, AURA SYNC, Symphony For VGA Holder - AORUS

\$44.95

Product Images

Short Description

These new adjustable solid cnc'ed aluminum alloy GPU bracket not only help fight against GPU sag but they also look great in any build. With a adjustable arm they can work with any VGA card. The brackets include built-in A-RGB LED's for dramatic lighting effects! The LED'D on the bracket can support Asus Aura on your motherboard, Symphony, or if your motherboard has no ARGB support, we can include a controller to handle the lighting for a small extra fee.

Description

These new adjustable solid cnc'ed aluminum alloy GPU bracket not only help fight against GPU sag but they also look great in any build. With a adjustable arm they can work with any VGA card. The brackets include built-in A-RGB LED's for dramatic lighting effects! The LED's on the bracket can support Asus Aura on your motherboard, Symphony, or if your motherboard has no ARGB support, we can include a controller to handle the lighting for a small extra fee.

The length of the cable on this bracket is about 30CM. It is suitable for the interface position of the lower left corner of the motherboard. In other locations, you need to take another RGB extension cable.
