## Short Description

The Republic of Gamers Ryujin 240 Liquid CPU Cooler from Asus features a 240mm radiator and comes with two performance 120mm Noctua NF-F12 fans. Unlike other all-in-one CPU coolers, the Ryujin 240 features an embedded fan in its pump housing, which cools nearby components such as VRMS, M.2 slots, and circuitry. On top of that, the pump housing also has a built-in 1.77" LiveDash OLED display and AuraSync RGB LED lighting, which you can customize using the LiveDash software.

## Description

---

The Republic of Gamers Ryujin 240 Liquid CPU Cooler from Asus features a 240mm radiator and comes with two performance 120mm Noctua NF-F12 fans. Unlike other all-in-one CPU coolers, the Ryujin 240 features an embedded fan in its pump housing, which cools nearby components such as VRMS, M.2 slots, and circuitry. On top of that, the pump housing also has a built-in 1.77" LiveDash OLED display and AuraSync RGB LED lighting, which you can customize using the LiveDash software. While it's compatible with both Intel and AMD sockets, be sure to check the complete list of supported sockets as well as the clearance around your motherboard to prevent any compatibility issues.

ROG Ryujin is the flagship all-in-one cooler for high-end builds designed to deliver the best thermal performance. Featuring Noctua Industrial PPC fans for cooler and quieter operation, pump-on-demand fans for the pump housing for additional cooling to the VRM and G.P.U., ROG Ryujin keeps your system running at its absolute best. Coupled with a 1.77" LiveDash full-color OLED display and Aura Sync RGB lighting, ROG Ryujin is the ultimate thermal solution designed to become a vital part of your gaming rig.

## COOL TO THE CORE

### Noctua Industrial PPC fan

ROG Ryujin meets the thermal challenges of the latest multi-core CPUs with industrial-grade Noctua Industrial PPC fans in the radiator that deliver high performance and low noise operation. The 138 mm fans provide 120 m³/h of airflow at 1,000 RPM yet an extremely efficient with a 28.4 dB(A) acoustic footprint that's well below that competing fans.

### Pump embedded fan

With powerful, liquid cooling fans not situated around the CPU socket like a traditional fan, ROG Ryujin introduces the innovative water block fan embedded in the pump housing that circulates air to the CPU VRM, M.2 slot and surrounding components to dramatically reduce temperatures for improved performance and stability.

## NEXT LEVEL OF CUSTOMIZATION

### LiveDash OLED

ROG Ryujin is the world's first all-in-one to feature an embedded 1.77-inch LiveDash OLED that displays real-time system information\* and fan temperatures, voltages, fan speeds, or frequencies. You can also customize LiveDash to display a custom RGB or monochrome\* lighting effect that syncs to your system or operating system.

\*LiveDash only supports 60Hz and 120Hz refresh rates with 1080p resolution.

\*LiveDash only supports 60Hz and 120Hz refresh rates with 1080p resolution.

### Complete LiveDash customizability

The LiveDash software utility lets you easily customize ROG Ryujin's LiveDash OLED display with RGB lighting effects, select which system status to monitor, choose personalized CPU and temps to display, and control RGB lighting from an intuitive interface that supports settings in 4K or 8K for ultra-high resolution.

### Subtle, striking, sleek

Infused with Aura Sync lighting, ROG Ryujin's LiveDash OLED display and RGB lighting effects, select which system status to monitor, choose personalized CPU and temps to display, and control RGB lighting from an intuitive interface that supports settings in 4K or 8K for ultra-high resolution.

### PERFECT SYNCHRONIZATION

The impact of Aura Sync lighting can be further enhanced with Aura Sync Sync, which allows for seamless lighting effects with other Aura Sync-enabled system components and external accessories. Aura Sync gives you complete control of lighting across all compatible devices, letting you set it the way you want to display and sync.

\*Aura Sync works with 1000+ Aura Sync devices.

## Noctua Industrial PPC Fan

The ROG Ryujin comes with two industrial-grade 120mm Noctua NF-F12 fans that capable of running up to 2000 rpm to deliver 122 CFM of airflow with a 29.7 dBA rating.

## Pump Embedded Fan

Traditional liquid CPU coolers don't circulate air around the CPU socket, so the ROG Ryujin features an embedded fan in pump housing to cool nearby VRMs, M.2 slots, and circuitry.

Embedded Fan Details:  
OLED Display: 1.77" Full Color OLED Speed: 4800 rpm +/- 10 %  
Air Pressure: 3.94mm H2O  
Air Flow: 19.41 CFM  
Noise: 31 dBA

## LiveDash OLED

Aside from the embedded fan, the pump housing also has a 1.77" LiveDash color OLED display that can display useful system information such as temperatures, voltages, fan speeds, and more. You can also customize it using the LiveDash software utility to display an image or animation, up to 160 x 128 pixels big. Aside from the LiveDash OLED display, there's also a small strip of customizable RGB LED lighting, which you can sync with other AuraSync items for extra flair.

#### Innovative Design

The Asus ROG Ryujin is a good, but naturally luxurious AIO solution at a price of 1400 lira, which can be preferred for those who prioritize something luxurious but beautiful like maximum silence and display. TURKEY 2019/09/02

#### DD´s Recommended

Both models (Ryuo and Ryujin) have an extra feature that you practically won't find on any other AiO in the market. And that is OLED display, which can display many things. ASUS bet on a special design and super quality fans, and it's a lot to know about the price. It is high, the price/performance ratio of both ASUS AiO coolers is definitely not a strong point, but if you don't mind, then I recommend it. CZECH REPUBLIC 2019/03/05

#### HITPOINT Sticker of Quality

As for the Ryujin, the design of the cooler has generally disappointed me, looking more like a cheaper version of Ryuo. On the other hand, it has a much quieter run that is ensured by a pair of Noctua coolers. Ryujin has greater efficiency than Ryuo through AIR Flow. Result of the measurements was beautiful and sustainable in this case 63 degrees, which is relatively decent for tested clock and processor. CZECH REPUBLIC 2019/02/26
