Short Description

The Republic of Gamers Strix Flare Backlit Mechanical Keyboard from ASUS is a gaming-focused keyboard designed with the hardware and features gamers need on the battlefield. It features durable, reliable Cherry MX Red switches and customizable RGB lighting that you can sync up with your other RGB lighting systems. Moreover, with anti-ghosting and N-key rollover, it can accurately recognize your commands regardless of how complicated or how many keys you press simultaneously.

Description

The Republic of Gamers Strix Flare Backlit Mechanical Keyboard from ASUS is a gaming-focused keyboard designed with the hardware and features gamers need on the battlefield. It features durable, reliable Cherry MX Red switches and customizable RGB lighting that you can sync up with your other RGB lighting systems. Moreover, with anti-ghosting and N-key rollover, it can accurately recognize your commands regardless of how complicated or how many keys you press simultaneously. For your convenience, it has built-in multimedia hotkeys and supports macros. To access all of its features and customization options, be sure to download the optional Asus software.

ROG Strix Dora RGB mechanical gaming keyboard with Cherry MX switches, customizable illuminated badge and dedicated media keys for gaming

Cherry MX switches are the most reliable mechanical switch available, offering a long lifespan of up to 50 million keystrokes. The Cherry MX Red switch is designed for gaming, providing a linear, smooth keystroke with no audible click. The Cherry MX Blue switch is designed for typing, providing a tactile, clicky keystroke. The Cherry MX Brown switch is designed for gaming and typing, providing a tactile, clicky keystroke with a lower profile than the Cherry MX Blue switch.

Meet our gamer with the ROG Strix Dora RGB mechanical gaming keyboard that's got everything you need and more. Feel the satisfaction of Cherry MX Red switches, the customizable illuminated badge, and the dedicated media keys for gaming. It's the ROG Strix Dora RGB mechanical gaming keyboard that's got everything you need and more.

CHERRY MX RGB MECHANICAL SWITCHES

Customized with Cherry MX RGB switches, ROG Strix Dora RGB mechanical gaming keyboard offers the ultimate gaming experience with its customizable illuminated badge and dedicated media keys for gaming.

DEDICATED MEDIA KEYS FOR GAMERS

Audio control is a vital part of gaming, and the ROG Strix Dora RGB mechanical gaming keyboard has dedicated media keys for volume control, mute, and play/pause. These keys are located on the left side of the keyboard, making them easy to reach while gaming.

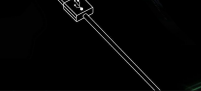

DETACHABLE WRIST REST

Get extra support and comfort while gaming with the detachable wrist rest. The wrist rest is made of soft, cushioned foam and is attached to the bottom of the keyboard. It can be detached and used separately, or it can be attached to the keyboard for extra support.

USB PASSTHROUGH

If you're a gamer, you know your USB devices are essential. The ROG Strix Dora RGB mechanical gaming keyboard has a USB passthrough port that allows you to connect your USB devices directly to the keyboard. This is useful for connecting your gaming mouse, headset, or other USB devices.

AURA SYNC

Light is a vital part of gaming, and the ROG Strix Dora RGB mechanical gaming keyboard has Aura Sync lighting. Aura Sync is a software-controlled lighting system that allows you to synchronize the lighting on your keyboard with the lighting on your other ROG devices. This creates a cohesive look and feel for your gaming setup.

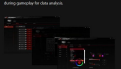

AURA SDK

ROG Strix Dora RGB mechanical gaming keyboard is part of the Aura Sync ecosystem. The Aura Sync ecosystem allows you to synchronize the lighting on your keyboard with the lighting on your other ROG devices. This creates a cohesive look and feel for your gaming setup.

ROG ARMOURY II

ROG Armoury II is a software-controlled lighting system that allows you to synchronize the lighting on your keyboard with the lighting on your other ROG devices. This creates a cohesive look and feel for your gaming setup.

DOWNLOAD ROG ARMOURY II

ONBOARD MEMORY
Store up to 8 custom key profiles in onboard memory, allowing you to switch between them instantly.

100% ANTI-GHOSTING & N-KEY ROLLOVER
Guaranteed key registration, no matter how many keys you press at once.

ON-THE-FLY MACRO RECORDINGS
Record up to 8 macro keys, allowing you to perform complex tasks with a single keystroke.

WINDOWS LOCK KEY
Lock the Windows key to prevent accidental activation while gaming.

DUAL TEXTURED CASE
The top and bottom plates feature a dual-texture design for enhanced grip and durability.

CABLE ROUTING
Cable management system that allows you to route your cable cleanly and discreetly.

Cherry MX Brown

Mechanical keyboards utilize a different type of key switch technology for a more durable and unique typing experience. The Cherry MX Red switch has an actuation force of 45 g and offers a small tactile bump when pressed, letting you know that the key has registered. This can be useful for typing or preparing for a movement while gaming. Unlike Cherry MX Blue switches, these do not have an audible "click" mechanism, allowing for a quieter operation. Noise generated from this keyboard will be from the key either springing back into place or "bottoming out" – making contact with the back plate after a particularly hard press.

Customizable Illuminated Badge

Personalize the Strix Flare with its customizable acrylic badge or keep the pre-installed ROG badge. Note: Use white or light-colored paint or stickers for better results. For a premium finish, try professional printing.

Dedicated Media Keys

The dedicated media keys include a volume scrolling wheel as well as play/pause, stop, back, and forward buttons. Located alongside are the Windows Lock and Brightness adjustment buttons.

Detachable Wrist Rest

Add extra support with the detachable wrist rest. It hooks into place with subtle grooves and can be removed when no longer needed.

USB Pass-Through

A USB Type-A pass-through port lets you quickly and easily connect USB peripherals such as a mouse, headset, and so on.

ASUS Aura Sync & ROG Armoury II

With ASUS Aura Sync, you can light up your keyboard with your choice of colors and lighting effects to fit your style. Be sure to download the optional Aura Sync SDK software to customize your settings. For user profiles, macros, and performance options, you'll need to download the ROG Armoury II software.
