Description

Crank up your gaming experience by installing the 32GB Crucial Ballistix DDR4 3000 MHz UDIMM Gaming Desktop Memory Kit into your desktop computer. Designed for specifically for overclocking, this 32GB memory kit includes two 16GB 288-pin DDR4-3000 non-ECC unbuffered DIMMs (UDIMM) black extruded aluminum heatsinks, and built-in temperature sensors. Overclocked memory helps complex games and large files load faster, and increased memory space allows you to run demanding applications, multitask, and edit large photos and videos more efficiently. This memory kit has 15-19-19-39 latency timings, a 1.35V voltage requirement, and is tested to work with both AMD and Intel motherboards. It also includes XMP 2.0 support, which allows for easy overclocking for even higher performance.Built for Overclocking. XMP 2.0 Support Extreme Memory Profiles (XMP) is a technology developed by Intel that allows users to take advantage of higher than standard memory speeds by selecting different profiles. This removes the need to manually adjust the memory's frequency, voltage, and timings.

Ultimate Mod

Create your own custom light bar with a 3D printer and provided 3D files. Control light pattern and brightness via software utilities.

Extreme Domination

Designed for extreme overclocking[2] enthusiasts to get that extra edge in game, or to blow away world-record speeds.
