

Aerodynamic Fan Adapter 60mm to 92mm - UV Sensitive Blue

\$3.99

Product Images

Short Description

This 60mm to 92mm fan adapter allows you to run an 92mm fan where a 60mm would be normally used. The use of a larger 92mm fan will result in more airflow and lower noise output. In addition, since the adapter makes the fan sit further away, the air will be concentrated in the middle making it ideal for cooling heatsinks.

Description

This 60mm to 92mm fan adapter allows you to run an 92mm fan where a 60mm would be normally used. The use of a larger 92mm fan will result in more airflow and lower noise output. In addition, since the adapter makes the fan sit further away, the air will be concentrated in the middle making it ideal for cooling heatsinks. This new UV sensitive version glows brightly under a UV light making it a very attractive addition to your case.

Comes with instructions and mounting screws.

Specifications

- Cool UV Blue Plastic
