Lian Li PC-S80B Silent Black Aluminum Server Case

$269.95

Product Images

Short Description

Lian Li PC-S80 series brings you sophistication, elegance and superior cooling. This new generation super silent case exudes modern design with new patent cooling kit for better heat dissipating and a silent requirement using a two layer design that virtually eliminates case noise.

Description

Lian Li PC-S80 series brings you sophistication, elegance and superior cooling. This new generation super silent case exudes modern design with new patent cooling kit for better heat dissipating and a silent requirement using a two layer design that virtually eliminates case noise.

Visually, the front of the case features a beautifully ridged door panel. This is great to keep prying hands away from your drives by keeping them fully secured in a lockable case. The main-board mounts standard ATX. The power supply is mounted at the top of the case in a chambered area to aid in cooling using a new fan and ducting system.

The new PC-S80 also keeps your hard drives cool using a crowding design HDD rack with twin 120mm silent cooling fans. CPU is aided by a 120mm fan and duct assembly that brings in fresh air to the CPU area. The side walls are made of 2mm thick solid aluminum and slide into place and lock in with only one thumbscrew. The case includes two 120mm fans in the front, one 120mm in the rear and an 80mm internal fan all of which assist in the overall case cooling.

The case interior has four 5.25" bays and five 3.5" internal bays, and seven rear expansion slots. It can accept standard ATX motherboards which have a maximum size of 12"x9.5". The dimensions of this awesome looking case are 210(W)x590(H)x590mm(D).

On the top front there is one FireWire port, two USB 2.0 ports, and two audio ports for easy connection of gaming and multimedia devices. Also included in the front is one aluminum optical drive bezel, and one floppy disk drive bezel to keep the look of this ultra modern.

Like all Lian Li cases, the PC-S80 Series offer the sturdy, lightweight construction you've come to expect. With the capacity to hold up to 9 internal drives, you should have plenty of room to build that dream system of yours. These aluminum cases not only keep your system cooler than most other cases but, the stylish ridged front aluminum door will impress anyone. The cowling system on the rear of the case is the usual Lian Li engineering brilliance.

So whether you are using this case to hold your dream system, or to display with your other pieces of art, this case will continue to impress you and all others that see it, for years to come!
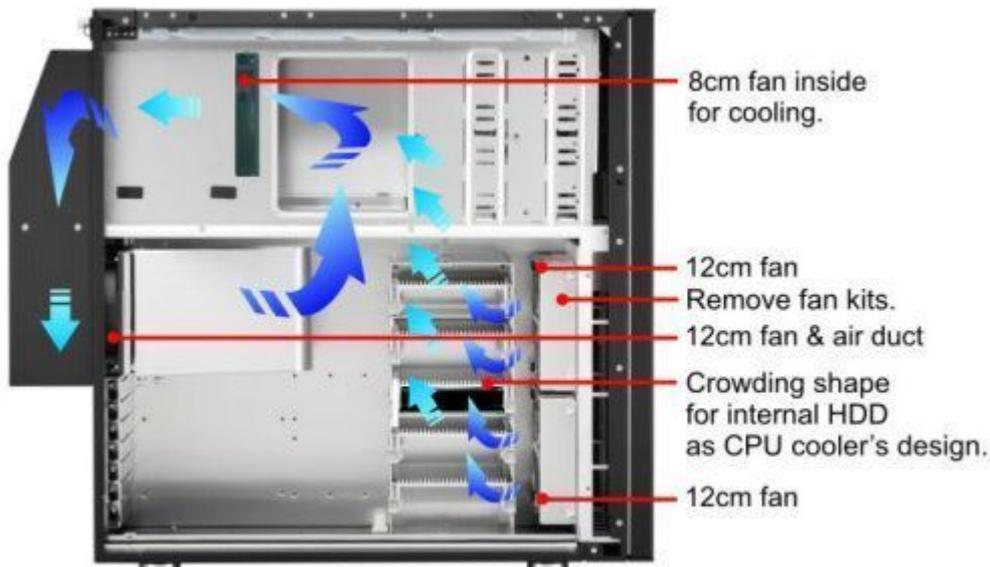

Features

- Interior three zones design for better heat dissipating
- Aluminum door with lock
- Quiet Cooling Kit rear duct assembly
- Multi-media I/O.
- Polished case feet
- Aluminum Optical Drive Bezel
- High quality Stainless steel power button.
- Crenulated edge side panels.
- High efficiency silent fan with anti-vibration rubber rings installed.
- Side panels can be assembled with the smart design screws.
- Sliding track for of hidden H.D.D

Duple sound proof effect

First layer

8cm fan inside for cooling.

12cm fan
Remove fan kits.
12cm fan & air duct

Crowding shape for internal HDD as CPU cooler's design.

12cm fan

Second layer

Specifications

- DIMENSION: 210 X 590 X 590mm (W,H,D)
- 4x5.25, 5x3.5¨internal(crowding shape bracket for internal HDD)
- 12 cm ball bearing fan x3, 8 cm ball bearing fan x1, CPU air duct for 12cm fan x 1, rear sound proof cover x 1
- M/B type: Extended ATX & pentium 4 (MAX SIZE: 12" x 9.5")
- Front I/O: IEEE 1394 port x 1
- USB 2.0 x 2 MIC x 1; EAR x 1
- Slot: PCI Slot x 7

Additional Information

Brand	Lian-Li
SKU	PC-S80B-D
Weight	70.0000
Color	Black
Chassis Form Factor	Full Tower
Side Panel	No WIndow
Motherboard Support	E-ATX
Material	Aluminum
PSU Wattage	No PSU
