## Product Images

## Short Description

---

For easy access to your slim PC or UPS unit, this adjustable metal stand elevates your UPS or slim PC off the floor, both in function and in form. Forged from steel, it puts your slim PC or UPS up on wheels so you can roll it around without any lifting. The more digital our lifestyle gets, the more we need to plug and unplug things from the computer.

## Features

---

Adjustable computer stand is designed to support and elevate most desktop / tower style computers. Increases airflow and saves desktop space by storing the CPU underneath or beside your desk.

Locking and swiveling casters provide mobility and stability. Rolls for easier access to back of the computer

Rubber pads on clamps provide a firm grip on your slim PC or UPS and protects it from scratching and scuffing.

Width is easily adjustable from 3.8" to 7" (9.7 cm to 18 cm) to hold most computers, no tools needed

Base Plate Dimensions: 7.4" to 10.6"

Side Walls Height: 3.5"
