

# Aquatuning screws M3 x 30mm flat head (4 pieces)

\$1.00

## Product Images

## Short Description

Cross-head screws for mounting fans on radiators. With flat head screws the dimension refers to the actual length of the thread. The complete screw length is specified for countersunk screws.

## Description

---

Cross-head screws for mounting fans on radiators. With flat head screws the dimension refers to the actual length of the thread. The complete screw length is specified for countersunk screws. These screws can be used to attach the radiator with fans and fan grilles to a housing. The M3 thread is compatible with (as of 05 2006):

NexXoS Pro

NexXoS Xtrem

Airplex Evo

## Specifications

---

Material: stainless steel

Important: These screws should only be used in combination with a 25mm fan, as the screws are too long for the narrower fan and then damage the radiator. If a fan cover is used with narrower fans (20mm), these will of course fit again.

Caution: Screwing in too far can damage the radiator, make sure the screws are the correct length. These screws are not always suitable
