Short Description

The Alphacool Aurora Acryl GPX-A 6800(XT) Eisblock combines style with performance and extensive digital RGB lighting. With experience of over 16 years, Alphacool the ability to create GPU blocks that represent high quality and fantastic performance. This perfectly describes the Aurora Acryl GPX Eisblock

Description

The Alphacool Aurora Acryl GPX-A 6800(XT) Eisblock combines style with performance and extensive digital RGB lighting. With experience of over 16 years, Alphacool the ability to create GPU blocks that represent high quality and fantastic performance. This perfectly describes the Aurora Acryl GPX Eisblock

Features

More performance!

During the development of the Eisblock Aurora GPX-A Radeon 6800 (XT) graphics card water cooler, value was of course also placed on increasing the performance. In the first step, the cooler was brought closer to the individual components by reducing the heat-conducting pads to a thickness of 1 mm. In the second step, the nickel-plated copper block was also made thinner. Instead of the previous 7 mm, it is only 5.5 mm thick. The water flow has also been optimized inside the cooler. All important components such as the voltage converter and the RAM are now cooled significantly better and more effectively by the water. All of this ensures a significant increase in cooling performance.

New design!

The Eisblock Aurora GPX-A Radeon 6800 (XT) cooler was fundamentally designed so that the lighting is more in the foreground than with the previous models. The addressable digital RGB LEDs are embedded directly in the cooling block and they run along the side of the entire cooling block. The effect is lighting that encompasses the entire cooling block. No corner or edge remains unlit by the aRGB LEDs. The new design is more angular, with all edges beveled. The result is better light scattering in the water cooler due to the reflections on these slopes. They also create various contours that give the Eisblock Aurora GPX-A Radeon 6800 (XT) cooler its very own visual touch.

Copper or aluminum?

Alphacool of course only uses copper in its water coolers. The copper of the Eisblock Aurora GPX-A Radeon 6800 (XT) is nickel-plated. Compared to the previous models, however, Alphacool has improved the type of nickel plating again, which significantly increases the acid resistance. This should prevent the nickel plating from flaking off. And why does Alphacool use copper instead of aluminum? Copper simply has a thermal conductivity that is almost twice as high as aluminum and is therefore clearly the better material for water cooling.

Is that all the news?

The graphics card water cooler Eisblock Aurora GPX-A Radeon 6800 (XT) also uses the new patented locking screws, which are flush with the surface of the terminal. The Alphacool logo is now in the corner on the top and is also fully illuminated. Corresponding designations of the compatible graphics card types can be seen on the front of the terminal. Of course, these are also fully illuminated by the digital LEDs. IN and OUT are now identified by small, discreet triangles. They are easily recognizable and fit perfectly into the entire optical line of the graphics card water cooler.

The Alphacool Aurora GPX-A Radeon 6800 (XT) Acryl is in every respect a complete further development of the previous Alphacool graphics card water cooler. No technical compromises were made, rather the entire technical know-how flowed into the development and implementation.

Specifications

Note:

- This article is delivered with a backplate

Technical data:

L x W x B: 142,5 x 260 x 24,5 mm

Material cooler: Nickle plated copper

Material top: Acryl

Thickness cooling fins: 0,6 mm

Threads: 4x G1/4"

Power connector Digital RGB: 3-Pin 5V (0,5A)

Graphics Card Configurator: [Click here!](#)

List of Compatibility: [AMD graphic cards](#)

Compatibility list:

- Sapphire NITRO+ AMD Radeon RX 6800 XT Gaming 16GB GDDR6

Additional Information

Brand	Alphacool
SKU	AC-11948-D
Weight	3.5000
Color	RGB
Vga	AMD Radeon RX 6800XT Nitro+
Block GPU Type	AMD
Block Style	Copper-Plexi
Vendor SKU/EAN	4250197119481
Special Price	\$59.95
