Short Description

Aluminum Heatsink ARGB Radiator Hard Disk Heat Dissipation for M.2 2280 SSD

Description

Aluminum Heatsink ARGB Radiator for M.2 2280 SSD

Due to the light and screen setting difference, the item's color may be slightly different from the pictures. Please allow slight dimension difference due to different manual measurement. The 2280 SSD that supports single/double-sided particles does not support the M.2 interface on the back of the ITX motherboard.

Features

Made of aluminum alloy, it has excellent heat dissipation effect. The cooling vest is compatible with M.2 interface 2280 specification SSD, while it does not interfere with PCI-E slot equipment. 16 million color achieves a fixed monochromatic, rainbow, and multi-color cycle.
