

WATERCOOL

Watercool MO-RA3 420 D5-DUALTOP Module

\$154.95

Product Images

Short Description

This module, made of 2mm thick stainless steel, was designed to attach the Watercool D5-DUALTOP in just a few steps. This enables the D5 dual top to be mounted on the MO-RA3 420 together with the HEATKILLER® Tube expansion tank. To prevent vibrations and oscillations, the construction is mounted on the mounting plate with an elastic vibration damper unit.

Description

This module, made of 2mm thick stainless steel, was designed to attach the Watercool D5-DUALTOP in just a few steps. This enables the D5 dual top to be mounted on the MO-RA3 420 together with the HEATKILLER® Tube expansion tank. To prevent vibrations and oscillations, the construction is mounted on the mounting plate with an elastic vibration damper unit.

The module was developed in such a way that a high level of compatibility is guaranteed. The installation of a HEATKILLER® Tube in the 150 or 200 format can therefore also be carried out without any problems.

The Watercool Industrial Line is characterized by a simple design, maximum functionality, high performance and robust materials.

Specifications

Technical specifications:

- Material: stainless steel
- Material thickness: 2mm

Scope of delivery:

- Mounting module
- Watercool D5 double top

Compatibility:

- Watercool MO-RA3 420 Industrial Line
- Watercool MO-RA3 420 LT
- Watercool MO-RA3 420 Pro
- HEATKILLER® Tube 150/200 (in connection with Basic Mounting Kit)

Additional Information

Brand	Watercool
SKU	WC-31032
Weight	3.5000
Color	Black
Radiator Size	1260 (9x140mm)
Radiator Accessory Type	Bracket
Material	Stainless Steel
Vendor SKU/EAN	4251312604530
