Short Description

The world renowned water cooling manufacturer, Alphacool, offers a new simple solution to start your PC fast and easy with the Powerbutton.

Description

The world renowned water cooling manufacturer, Alphacool, offers a new simple solution to start your PC fast and easy with the Powerbutton. Most computers are under or on the side of your desk. In this position, the start button is sometimes difficult to reach. Also modders usually like to remove or reposition the start buttons differently to create something far nicer.

All you need is a anti vandal switch with a 19 mm thread. The extensive selection of anti vandal switches gives you the freedom to choose your colour and design completely. Furthermore you need a suitable cable, which you can connect to the switch and your mainboard. Here we recommend the Alphacool Powerbutton/Button connection cable with a length of 2 or 3 m.

Features

Technical Details
