\$154.99

Short Description

Imagine capturing the listening experience of a high-end multi-speaker system in a professional studio

Description

MEET CREATIVE SXFI AIR, WITH SUPER X-FI HEADPHONE HOLOGRAPHY

Imagine capturing the listening experience of a high-end multi-speaker system in a professional studio, and recreating the same expansive experience — with the same original depth, detail, realism, and immersiveness — in your headphones.

Each of us hears the world differently — our unique head and ear shapes affect how we perceive sound. Super X-Fi personalizes the headphone audio experience based on how you hear sound to give you the most optimized and realistic listening experience.

This is done by simply taking three photos of your face and ears with your phone via the SXFI App.

The end result is holographic audio personalized to your own ears for an unbelievable headphone experience that's as good as the real thing.

CREATIVE SXFI AIR

Bluetooth and USB Headphones with Built-In Super X-Fi Technology for Personalized Audio Holography

Say hello to the SXFI AIR – All the goodness of Super X-Fi technology, encapsulated in a pair of headphones. **Wirelessly.**

Features

- **SUPER X-FI TECHNOLOGY INSIDE** | Showcased at CES 2018 and 2019, and critically-acclaimed by respected journalists from CNET and PCWorld, Super X-Fi delivers a customized, tailor-made surround sound audio experience by tuning audio specifically to your own individual ears via an app on your phone. The result is headphone audio that sounds like it is coming from multi-channel speakers placed a distance away from the listener, perfect for music and movies
- **BLUETOOTH, USB, AND EVEN SD CARD CONNECTIVITY** | The Creative SXFI AIR is able to connect to multiple devices. Use it to complement your music and movies from your phones or tablets via Bluetooth, or enjoy your games from your PC or PS4 via USB connectivity. You can even play songs directly from a microSD card. Regardless of the source, SXFI AIR will process your audio with Super X-Fi technology
- **FOR ALL MEDIA TYPES** | Once connected with your personalized Super X-Fi profile, you will be able to enjoy the full glory of Super X-Fi from all kinds of content, including streamed ones like Netflix, iTunes, YouTube, and even Spotify – hear cinematic audio with the same spatialized effect even if it's late at night (and when your loved ones or neighbors are sound asleep) without disturbing anyone
- **BUILT FOR COMFORT** | Not only designed for remarkable audio quality and long-lasting usage, SXFI AIR brings great comfort and better headphones experience! The SXFI AIR is fitted with high-quality, soft protein leather that are snug to your ears, and guarantees elevated comfort during extended use. It is also fully replaceable so you can switch them out through a quick-release mechanism for easy ear pad replacement
- **ADVANCED FEATURES** | Controls for audio playback are simple, with listeners using simple touch gestures to adjust volume and playback function. The headphones also feature Ambient Monitoring, where listeners can press a button and hear the world around them without removing the headset. Finally, the Creative SXFI AIR boasts a fully customizable RGB ring on each cup, with users being able to choose from 16 million colors
