Short Description

Sound BlasterX AE-5 Hi-Resolution PCIe Gaming Sound Card and DAC with RGB Aurora Lighting System

Description

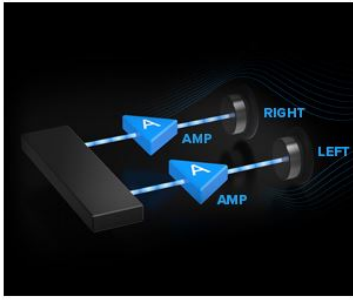

Sound BlasterX AE-5 Hi-Resolution PCIe Gaming Sound Card and DAC with RGB Aurora Lighting System

The Sound BlasterX AE-5 is a SABRE32 Ultra Class Hi-Resolution PCIe Gaming Sound Card and DAC with Xamp, a brand new discrete headphone amp utilizing bi-amplification technology. It delivers astonishingly pristine audio, and also shows off the Aurora Reactive Lighting System with 16.8 million customizable colors.

Features

Xamp Discrete Headphone Amplification

The Sound BlasterX AE-5 is the first sound card to feature Xamp, our custom-designed discrete headphone amplifier. Each audio channel is individually amplified, allowing the AE-5 to deliver a whole new level of pristine audio fidelity in an unaltered lossless model to each earcup regardless of demand.

Aurora Reactive RGB Lighting

Enjoy a symphony of lights and sound with the Aurora Reactive Lighting System! The AE-5 has customizable RGB LEDs on its body, and also features an included RGB LED strip. Program up to 16.8 million colors in different patterns with the free downloadable Sound Blaster Connect software for PC.

Audiophile Quality Meets Powerful Audio Processing

The Sound BlasterX AE-5 is a SABRE32 Ultra Class PCIe DAC which is perfect for hi-resolution audio for games, music, and movies. It delivers up to 32-bit 384kHz playback with a 122dB DNR, ultra-low distortion and jitter.

The Sound BlasterX AE-5 works with BlasterX Acoustic Engine, a suite of fully customizable audio processing technologies that deliver new levels of audio immersion and precision for the ultimate competitive advantage. These sound technologies create unprecedented levels of audio realism, including stunning 3D surround effects for your speakers and headsets.

Expand your horizon with Scout 2.0! Working with First Person Shooters, Scout 2.0 is the world's first smart gaming companion that enables you to visualize and see where enemies are on the radar. The gaming companion combines perfectly with Scout Mode, a technology that allows you to hear your enemies before they hear you!
