Short Description

This high-performance gaming headset features 50mm Neodymium full spectrum drivers for impactful sound and a detachable noise-reducing ClearComms microphone for crystal clear in-game voice comms.

Description

Creative Sound BlasterX H6

Hear your games in full 7.1 virtual surround sound*!

This high-performance gaming headset features 50mm Neodymium full spectrum drivers for impactful sound and a detachable noise-reducing ClearComms microphone for crystal clear in-game voice comms. Sound Blaster's full suite of powerful audio enhancements, including Scout Mode that lets you hear your enemies before they hear you, gives you a competitive edge.

The Sound BlasterX H6 also features three professionally-tuned hardware EQ profiles to match your preference. The over-ear design is fitted with breathable earcups for all-day comfort. With an included USB cable and a 3.5mm audio cable, this gaming headset works with your PC, game consoles** and mobile devices.

* 7.1 surround sound requires USB connection on PC. 3.5mm connection or on game consoles only support stereo sound.

** Xbox One via 3.5mm 4-pole audio cable (With Xbox One Stereo Headset Adapter), PlayStation 4 via USB, Nintendo Switch (no voice comms) via USB (Dock) and 3.5mm 4-pole audio cable (Console)

Features

- Sound BlasterX H6 7.1 USB Gaming Headset with Virtual Surround Sound for PS4, Xbox One, Nintendo Switch, and PC
- Professionally-tuned 50mm Neodymium magnet drivers
- Downloadable Sound Blaster Connect software for PC to apply instant audio enhancements - such as Surround, Crystalizer, and Bass - and tune it precisely so the audio sounds perfect
- Detachable noise-reducing ClearComms microphone is optimized to ensure your teammates will hear you loud and clear - The headset also features mic monitoring, so you can hear how your voice sounds over the mic
- Designed to be comfortable for long hours (Its earcups are made of breathable mesh fabric that allows heat to dissipate easier than leather cups, and the built in memory foam conforms to the shape of your head)
- Earcups houses an Aurora Reactive RGB Lighting ring - Customize the headset with special effects like pulsating or cycling, and with up to 16 million colors to choose from
