

Singularity Computers Spectre 3.0 Elite distribution plate – Black

\$449.00

Product Images

Short Description

The Spectre 3.0 Elite replaces the front or top panel, or both with a distribution plate.

Description

The Spectre 3.0 Elite replaces the front or top panel, or both with a distribution plate. This enhances the transparent 'ghostly' look of the case even further showing off the coolant and internal components even more. The Spectre 3.0 Elite distribution plate has two ports and inlet and outlet. When installed on the front panel the ports are at the top, and when installed on the top panel the ports are at the back. Connections can be made to and from either the radiators, other components in the build, or the Spectre 3.0 main distribution

plate. Both radiators can still be attached even when Elite Kits are installed on the front and top panels. There are spacers for airflow all of the way around the perimeter of the Elite Kit distribution plate.

Specifications

Specifications:
Manufacturing Process: CNC Mill, CNC Router.
Materials: 6061 Aluminum Anodized. Cast Acrylic.
Gaskets: Silicone.
Fasteners: Stainless Steel.
Ports: x2 G1/4" BSPP. 1x Inlet. 1x Outlet.
Assembly: Assembled by hand.
Testing: Factory pressure tested.

Included Items:
Spectre 3.0 Elite Distribution Plate: x1.

Installation:
The Spectre 3.0 Elite installs the same way as the stock front and top panels. For the water-cooling loop, connections can be made to and from either the radiators, other components in the build, or the Spectre 3.0 main distribution plate. The radiators can be attached normally and have the same adjustment as the stock Spectre 3.0 front and top panels.
