Short Description

Stranded Hook up Wire. Include 50 copper wires with a diameter of 0.18mm

Description

Model: UL3239-16AWG

Type: Stranded Wire Insulator

Material: Soft Rubber

Conductor Material: Tinned Copper

Conductor Specification: 50/0.18TS (Contains 50 copper wires with a diameter of 0.18mm)

Rated Temperature: -60 to 180 Celsius

Rated Voltage: 3000V

Colors: Black, Red

Application: Internal wiring in electric & electric equipment, toys, lighting fixtures, DIY

Certification: UL (E355578), RoHS, TS/16949

Features

- [Material] The core wire The copper core wire is made of high-quality materials and has the characteristics of bright appearance, low resistance, good conductivity, energy saving, environmental protection, durability and high safety. The sheath and insulation layer are made of super soft and high quality. material.
- [Performance] It has high and low temperature performance, electrical insulation performance, chemical stability, aging resistance, abrasion resistance, acid and alkali resistance, oil resistance, and long service life.
- [Simple operation] Easy to install.
- [Function] Durable silicone sheath is an ideal choice for replacing PVC coated wires.
- [Practicability] It is widely used in electrical equipment under industrial high temperature environment, and can also be used in the wire connection of household appliances.
