

Corsair iCUE Lighting Node PRO RGB Lighting Controller

\$64.99

Product Images

Short Description

The CORSAIR iCUE Lighting Node PRO RGB Lighting Controller brings stunning software-controlled RGB lighting to any PC, with four included RGB LED light strips boasting a total of 40 LEDs of RGB illumination.

Description

Customize your computer with this Corsair lighting node. Its four RGB LED strips work independently to showcase different lighting effects, and they adhere easily to your PC via their mounting tape backings and magnets. This Corsair lighting node has a USB 2.0 interface, so it plugs into the motherboard.

Features

Lighting Node PRO

Provides individually addressable RGB LED lighting with software control for unique lighting effects and vivid illumination of your PC.

Dual-channel lighting

Simultaneously control four individually addressable RGB LED strips and up to six HD or SP RGB fans (fans sold separately, RGB LED fan hub required).

Total control

The Corsair Lighting Node PRO and LINK software provide you with full control over your case lighting right from your desktop.

Individually addressable RGB LED strips

Each RGB LED strip is independently controlled and allows you to display different lighting effects and animations on each strip separately.

USB 2.0 interface

No special interface or additional hardware is required to use the Lighting Node PRO to its full potential, just plug it into an available USB 2.0 header on your motherboard.

Multiple mounting options

Mounting tape backings and built-in magnets provide multiple mounting options and make installation simple.
