Short Description

HR11S solar radio, It is ideal for trips, camping, outdoor, travel, survival etc. Because you can charge this wind up radio by the hand crank

Description

RETEKESS

HR11S solar radio, It is ideal for trips, camping, outdoor, travel, survival etc. Because you can charge this wind up radio by the hand crank, under the sun to Absorb solar charge or via USB charging

A flashlight like a lamp

This portable radio can help you shine in an emergency or a dark environment

Dynamo Radio Solar

In addition, there are still the solar cells on the top, so you don't need to worry that the outside device suddenly has no energy

Warning light and very loud siren

Clear and loud alerts and bright flash, an indispensable tool for you to draw attention to when you need help in an emergency

Features

3 Charging Methods and Replaceable Battery

Solar Charging

- Solar charging efficiency is relatively low, suitable for charging in direct sunlight.
- It takes about 25-30 hours under direct sunlight to fully charge.
- Although the efficiency is relatively low, it can be charged on a sunny window sill daily, effectively extending the battery life.

DC Charging

- Although DC charging is the fastest charging method, it may not be available in emergency situations such as power outages.
- It is more suitable to charge the radio periodically to ensure that the power of the radio is at a healthy level.
- It takes about 4-6 hours to fully charge the radio.

Hand Crank

- Hand-cranked charging is the first choice for emergency charging.
- About 1% of the mobile phone can be charged every 4 minutes. (The actual situation will vary depending on the speed)

850mAh Replaceable Battery

- 850 mAh rechargeable BL-5C battery included
- Charging time 4-6 hours
- High volume can work for 5 hours
- You can purchase a larger capacity BL-5C battery as a replacement

Features

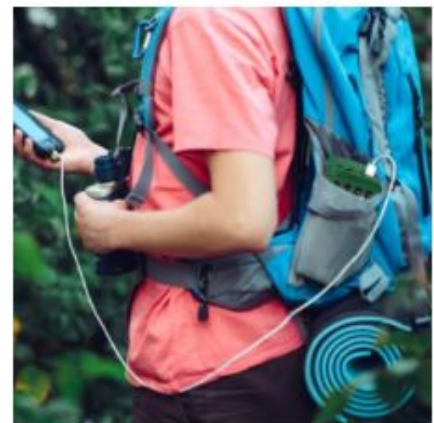

AM FM SW Radio

- FM: 64/87-108 MHz
- AM: 520/522-1710 KHz
- SW: 3-23 MHz
- Through good signal reception, you can keep information smooth in emergency situations

Flashlight and SOS

- Bright emergency lights help you disperse the darkness at night when the power is off.
- The loud SOS alarm helps you make it easier for others to find your location when you ask for help.

Charge Your Phone

- You can charge your mobile device through the USB socket to ensure smooth communication in an emergency.
- You can charge your phone 1% every 3-4 minutes
- Very suitable for traveling, camping, and indoor emergency kits.
